UI Animation	CoffeeScript	Data Visualization	Unit & End-to-end Testing
Mobile First	NodeJS	Accessibility	Readable Documentation
Emerging Interfaces	Shopify & Wordpress	Information Architecture	Software Architecture

EXPERIENCE

Front-End Web Developer

Bolster

I joined Bolster (a startup involved in managing construction projects) as the first front-end developer, and built web applications using AngularJS, LESS, and a grunt-based workflow.

New York, NY
July 2013 – Present

Freelance Web Designer

Self Employed

For the past few years, I've been building websites and web apps for freelance clients in San Francisco, New York, and Tokyo. Though I'm most comfortable with front-end design and development, I've done some full-stack work with Ruby and Nodejs as well as CMS's like Drupal, Wordpress, and Shopify.

Brooklyn, NY
May 2010 – Present

Front-End Web Developer

Busker.fm

At Busker (a music startup) I built SpineJS-based web apps for consumers, artists, and record labels. I learned a lot about Ruby and Sinatra working with our back-end developer, and advocated for non-blocking UI design and agile development.

New York, NY
Dec. 2012 – July 2013

Front-End Web Developer

Barrel

At Barrel, I built responsive websites on Wordpress, Shopify, and other CMS's. I also assisted in the development and maintenance of Phonegap-wrapped mobile web apps.

New York, NY
July 2012 – Dec. 2012

User Experience Engineer

Credit Suisse

I was part of a three-person development team that built internal and external web apps using ExtJS. We also led mobile web development efforts company-wide, and created and maintained a robust API for client widgets.

New York, NY
March 2011 – June 2012

Freelance IT Consultant

Self Employed

Before shifting focus to web design and development, I worked as a freelance IT consultant for small and medium businesses in Rochester, NY and the Bay Area. I focused on network troubleshooting, linux rollouts, and customer support infrastructure, and I'm both Sonicwall and A+ certified.

NY and CA
Aug. 2008 – May 2010

(Your time is important, so I'll stick to one page. Please see my online résumé for additional details - keats.me/resume)
