Mobile First	Shopify & Wordpress	Accessibility	Software Architecture

E X P E R I E N C E
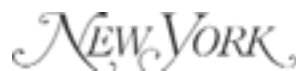

NEW YORK
Front-End Developer
June 2014 – Present

I recently joined NY Mag, and have been helping to build a nodejs-based CMS to host all of the magazine's various properties. I'm also spearheading the adoption of gulp and Stylus in the web team.

Bolster
Front-End Developer
July 2013 – June 2014

I joined Bolster (a remodeling startup) as the first front-end developer, and built web applications using AngularJS, LESS, and a grunt-based workflow.

Keats Heavy Industries
Freelance Web Designer
May 2010 – June 2014

I've built websites and web apps for freelance clients in San Francisco, New York, and Tokyo. I'm most comfortable with front-end design and development, but I've done some full-stack work with Sinatra, Nodejs and CMS's like Drupal, Wordpress, and Shopify.

BUSKER
Front-End Developer
Dec. 2012 – July 2013

At Busker (a music startup) I built SpineJS-based web apps for consumers, artists, and record labels. I also learned Ruby and Sinatra working with our back-end developer and introduced non-blocking UI design and agile development.

BARREL
Web Developer
July 2012 – Dec. 2012

At Barrel, I built responsive websites on Wordpress, Shopify, and other CMS's. I also assisted in the development and maintenance of Phonegap-wrapped mobile web apps.

CREDIT SUISSE
User Experience Engineer
March 2011 – June 2012

I was part of a three-person development team that built internal and external web apps using ExtJS. We also led mobile web development efforts company-wide, and created and maintained a robust API for client widgets.

(Your time is important, so I'll stick to one page. Please see my online résumé for additional details - keats.me/resume)
